FANCY
DOORS
AND **MOULDINGS**

fancydoors.com

Fancy Doors and Mouldings is a Canadian-owned and operated supplier of top-quality finishing materials with 100,000 square feet of a state-of-the-art production facility in Edmonton, Alberta. We carry a wide selection of interior and exterior finishing materials. Doors, moulding, railings, and hardware fill any size of a project. At Fancy Doors we also have a world-class Metal Doors shop for all your commercial fire-rated door needs.

We commit to the environmental stewardship and excellence of Canada and take pride in protecting our country's natural resources with the latest eco-friendly technologies.

Fancy Windows is a Canadian-owned and operated company based in Edmonton, Alberta. Equipped with 200,000 square feet of production area and state-of-the-art technology, we manufacture top-quality, energy-efficient windows, and doors. Our products are available in both PVC and aluminum materials, with various operation styles.

With an abundance of industry experts, Fancy Windows can meet the needs of its customers through high-quality products, convenient delivery services, and all-around exceptional service. Our customers include a wide range of home builders, contractors, and homeowners.

FIRE RATED Steel Doors

Door Designs

Diverse designs from standard flat industrial/commercial to the embossed decorative doors that would enhance any entrance way.

Louvers

Require special air circulation for either heating or cooling? No problem, we offer doors with variety of louver openings, both bottom and top.

FEATURES

Closer Reinforcing

All doors come with a closer reinforcement box at the top of each door and also the bottom of the door when reversible.

Panic-Bar Reinforcing

Reinforcing box for Panic-Bar ensures that hardware remains secure and fully functional.

Standard Hinge Preparation

On doors up to 7'-6" high: 1-1/2 pair of 4-1/2" x 4-1/2" template hinge reinforcements. On doors over 7'-6" high: 2 pair of 4-1/2" x 4-1/2" template hinge reinforcements.

End Channels

Projection-welded end channels at 3" to 4" centres, add strength and durability.

Lock Seam

Extra deep vertical mechanical full lock seam construction helps retain the quality and integrity of the door. A special sealant adhesive is also used on the edges to provide maximum strength and rigidity.

Inner core

Honeycomb cell paper comes with impregnated resin.

Standard Lock Preparation

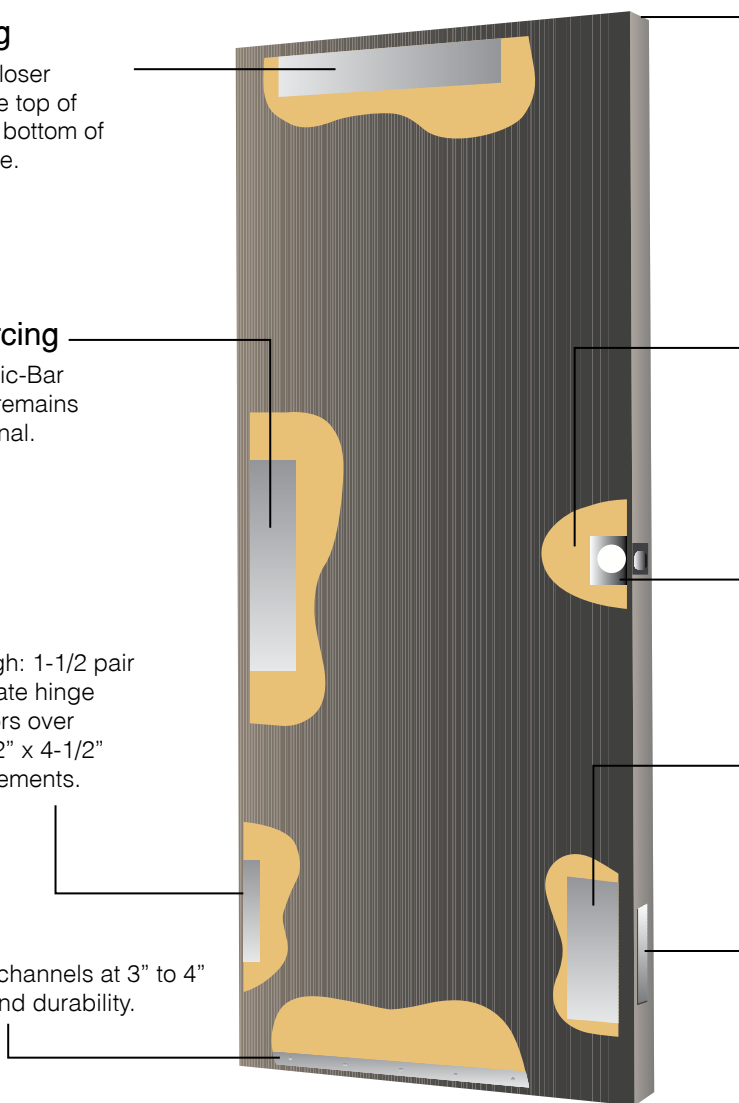

All doors include a Govt. #161 lock reinforcement with full barrel support or panic-bar reinforcing.

Surface Bolt Reinforcing

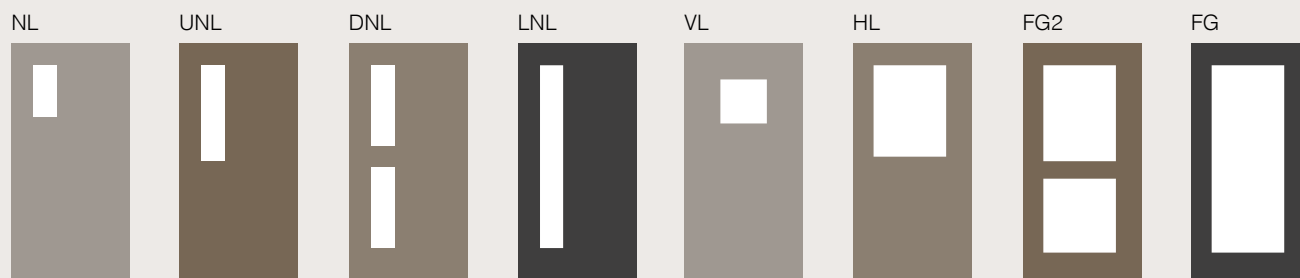

Special reinforcing plates for surface bolt preparation can be installed as an option.

Edge Tabs

Special Edge Tabs for flush bolt preparation can be installed as an option.

DESIGN Options

Glass Lites

Window kits can be installed with any size or shape you desire. Ask us for details.

INNER CORE Construction

You have a choice of five different inner cores.

Standard Honeycomb Core

- Rigid and impact resistant.
- 1" honeycomb cell paper construction has sanded edges.
- Resin impregnated.
- R factor: 2:4
- STC 20 in (sound transmission) 20 gauge material.
- Flat or 6 panel surface.

Polyurethane Core

- 1-3/4" polyurethane composite.
- All reinforcing boxes contain polyurethane.
- Excellent insulating.
- R factor: 12:0
- STC 26 in 20 gauge material.

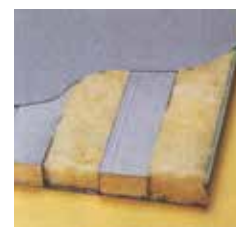

Temperature-Rise Core

- Solid mineral-fibre core slab.
- Exceeds current NFPA-80 recommendations.
- Ideal for stairwells and installations adjacent to fire-walls.

PolyStyrene Core

- 1-3/4" polystyrene composite construction.
- All reinforcing boxes contain polystyrene.
- Flat or 6 panel embossed surface.
- R factor: 7:0
- STC 26 in 20 gauge material.

Steel-Stiffened Core

- 20 gauge vertical steel stiffeners are welded or laminated to door skins at 6" centres.
- Fiberglass insulation provides excellent sound-deadening.
- For extra heavy-duty requirements, door edges can be tack-welded, filled and ground smooth.

ROUGH OPENINGS	WIDTH	HEIGHT	EXAMPLE
Welded steel frame	Door size + 4 1/4"	x Height + 2 1/4"	3070 = 40 1/4" x 86 1/4"
Knock down steel frame	Door size + 2"	x Height + 1"	3068 = 38" x 81"
Expandable steel frame	Door size + 1 3/4"	x Height + 7/8"	2868 = 33 3/4" x 80 7/8"
Suite entry in wood frame	Door size + 2"	x Height + 2"	3068 = 38" x 82"
Interior door	Door size + 2"	x Height + 2 1/2"	2668 = 32" x 82"
Pocket door	Door size x 2 + 1"	x Height + 4 1/2"	2868 = 65" x 84 1/2"
Exterior residential door	Door size + 2"	x Height + 3"	3068 = 38" x 83"
FINISHED OPENINGS	WIDTH	HEIGHT	EXAMPLE
Bi-Fold door	Nominal door width x	80 1/2"	4068 = 48" x 80 1/2"
Bi-Pass door	Nominal door width x	80 1/2"	5068 = 60" x 80 1/2"

* NOTE: This rough openings are for standard size doors as manufactured/ distributed by Fancy Doors and Mouldings Ltd. Please call 780.432.7700 for confirmation of non-standard sizes.

STANDARD Frames

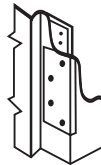

“AS” material

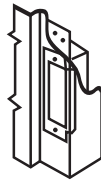

Our standard steel door frames are available in 14, 16 and 18 gauge wipe-coat galvalume steel and can be manufactured to meet all architectural design specifications. Warnock Hersey fire labeling is available when required. Standard profiles include 4-3/4", 5-3/4", 6-3/4" and 8-3/4".

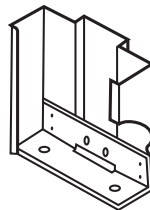

- All KD frames have precise, mitred corners.
- All welded corners are ground smooth and primed for a more attractive finish.
- A special tab holding system provides additional strength and locks the frame in position on the stud.

- Special mortar guards on hinge reinforcements to prevent mortar fill-in.
- 10 gauge galvanized reinforcements add strength and help prevent sagging.

- One-piece reinforcements are projection-welded in place to increase strength and rigidity.

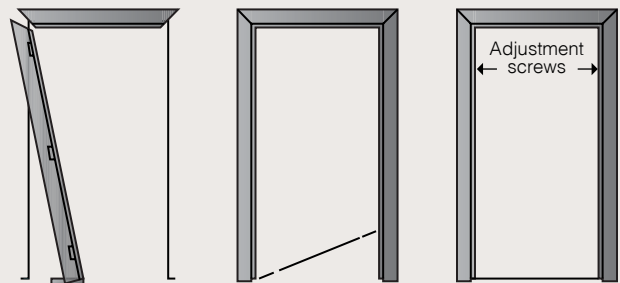

- 16 gauge wipe-coat galvalume floor anchor is welded in place for easier fastening.
- 5/8" stops provide a large surface for weather-stripping.
- Frame is prepared for silencer bumper holes.

FRAME Installation

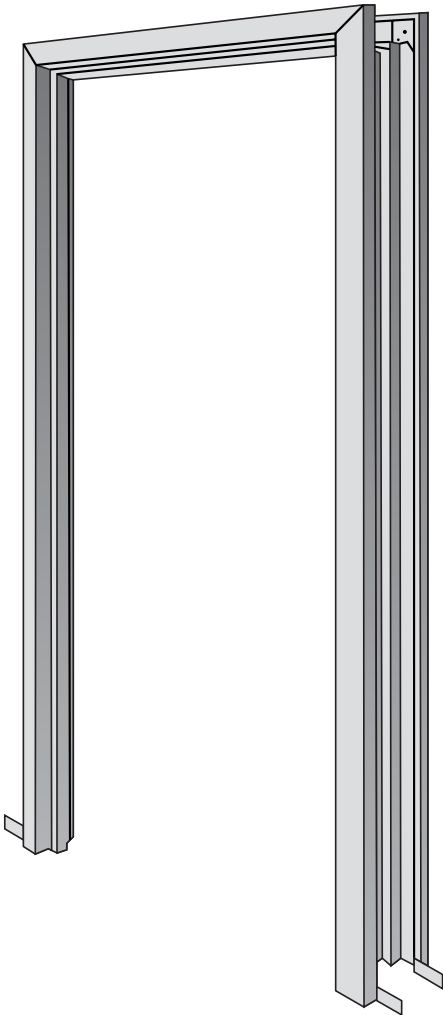

With all frame, drywall rough opening should be 2" wider and 1" higher than door width and height.

1. Centre header piece in rough opening.
2. Slip jamb tabs into header slots, pivot jambs to locked position. Adjustable anchors should be as tight as possible in throat opening.
3. Locate removable wooden spreader bar at base.
4. Bend corner tabs to attach header piece.
5. Square the frame and tighten adjustment screws.

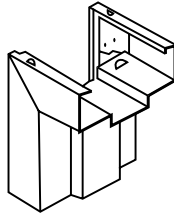

DRYWALL Frames

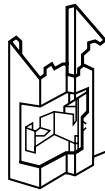

“KDDW” material

Our drywall frames are available in 18 gauge wipe-coat galvalume and 16 gauge. They can be accommodated any wall thickness and heavier interior applications. Standard drywall KDDW frames are available in 4-1/2", 5-5/8", 5-3/4" or 5-7/8" jamb depths.

- Accurately machined mitres make corners smooth and attractive.

- Adjustable tension anchor for secure anchoring.

- 18 gauge galvalume strike-box reinforcements are projection-welded to the frame.

- 10 gauge galvalume hinge reinforcements are also projection-welded to the frame.

EXPANDABLE Drywall Frames

“EP” Material

An expandable frame that can be adapt to 3 1/2" to 12" wall condition. This product is ideal for that difficult project requiring various jamb-depth material. This 16 or 18 gauge product is prepared for silencer holes, ASA strike, counter sunk face holes and 4 1/2" hinge reinforcements. This product can be fire-rated covering an opening up to 8'0" x 8'0" with a 1 1/2 hour rating.
